The date the fund started	28 November 2018

What are the risks of investing?

Risk indicator for the Ranfurly New Zealand Dollar Conservative Fund¹.

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at www.sorted.org.nz/tools/investor-kickstarter.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on market index returns data for a 5 year period to 31 December 2019¹.

RANFURLY SUPERANNUATION SCHEME

While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the Product Disclosure Statement (**PDS**) for more information about the risks associated with investing in this fund.

Total fund charges (estimated)³	1.49%
Which are made up of—	
Total management and administration charges (estimated)³	1.49%
Including —	
Manager's basic fee	1.00%
Other (estimated) management and administration charges ⁴	0.49%

Other charges

The Funds may incur additional charges from the Underlying Funds when making an investment or withdrawal. More information on these fees is in the 'Other Material Information' document on the Ranfurly Superannuation Scheme's offer register at www.companiesoffice.govt.nz/disclose.

Estimated fund charges are stated GST inclusive.

Investors may also be charged individual action fees for specific actions or decisions (for example, withdrawal fees in certain circumstances, switching fee for second or subsequent fund switches).

RANFURLY SUPERANNUATION SCHEME

See the Product Disclosure Statement for more information about those fees.

Small differences in fees and charges can have a big impact on your investment over the long term.

Example of how this applies to an investor⁵

John had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, John received a return after fund charges were deducted of \$1,511 (that is 15.11% of his initial \$10,000). John paid GBP0 in other charges. This gives John a total return before tax of \$1,511 for the year.

Notes

¹ This fund came into existence on 28 November 2018. To calculate the risk indicator, market index return data has been used for the five year period ended 31 December 2019. Using market index return data may make the risk indicator a less reliable indicator of how much fund values are likely to go up and down in future.

² The fund has not yet been in existence for a 12 month period.

³ Including GST. The fund has not been in existence for a 12 month period, so the Annual Fund Charges are based on an estimate of assets under management, fund performance, fees and expenses forecast to occur in the 12 months following the first unitisation of the fund. More information about the estimated Annual Fund Charges is available on the Ranfurly Superannuation Scheme's offer register at www.companiesoffice.govt.nz/disclose.

⁴ As the fund has not been in existence for a 12 month period, these fee estimates are based on our best estimate of the forecast asset flows and fund performance. Fee estimates are calculated monthly based on agreed fee rates as a % of forecast assets in the fund or by allocating estimated direct costs to the fund. We have included all known and expected expenses of the fund in the estimate of Annual Fund Charges. Included in the Annual Fund Charges is an estimate of fees charged monthly by the underlying investment managers to their funds. More information about the estimated Annual Fund Charges is available on the Ranfurly Superannuation Scheme's offer register at www.companiesoffice.govt.nz/disclose.

⁵ As the fund has not been in existence for a 12 month period, the example has been calculated based on the market index return less estimated Annual Fund Charges. The impact of tax on the market index return cannot be calculated until the Scheme is invested. The Scheme invests into foreign assets where income is determined under the Fair Dividend Rate Method and is subject to tax under the Foreign Investor Zero Rate PIE tax regulations.

⁶ Other investments is made up of unrealised gains on NZD:GBP forward currency contracts.
