## RANFURLY STERLING BALANCED FUND

### FUND UPDATE

For the quarter ended 30 September 2018.

This fund update was first made publicly available on 25 October 2018.

#### What is the purpose of this update?

This document tells you how the Ranfurly Sterling Balanced Fund has performed and what fees were charged. The document will help you to compare the fund with other funds. Ranfurly Strategic Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

#### Description of this fund

The Fund invests directly into underlying funds in proportions determined by the Manager to achieve the investment objective of the Fund. The Fund currency is Pounds Sterling (**GBP**). The objective of the Fund is to balance capital preservation and capital growth, with a level of volatility that generates a positive return with a moderate level of risk associated with investing in a mix of equity, fixed interest and cash.

Total value of the fund	GBP 5,258,203
Number of members in the fund	45
The date the fund started	30 November 2016

#### What are the risks of investing?

Risk indicator for the Ranfurly Sterling Balanced Fund<sup>1</sup>.

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at [www.sorted.org.nz/tools/investor-kickstarter](http://www.sorted.org.nz/tools/investor-kickstarter).

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on a combination of market index returns data and actual returns for a 5 year period to 30 September 2018<sup>1</sup>. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

## Notes

---

<sup>1</sup> This fund came into existence on 30 November 2016 and received its first investment on 22 September 2017. To calculate the risk indicator over a 5 year period, market index return data has been used for the period ended 30 September 2017 and actual returns have been used from 1 October 2017 to 30 September 2018. Using market index return data may make the risk indicator a less reliable indicator of how much fund values are likely to go up and down in future.

<sup>2</sup> The fund has not been invested for a 12 month period, so the Annual Fund Charges are calculated based on an actual assets under management and actual fees and expenses from the first unitisation of the fund on 22 September 2017 to 31 March 2018.

<sup>3</sup> The fund has not been invested for a 12 month period, so the Annual Fund Charges are calculated based on an actual assets under management, actual fees and expenses and actual underlying fund manager fees apportioned for the period the fund has been invested, from the first unitisation of the fund on 22 September 2017 to 31 March 2018.
