What are the risks of investing?

Risk indicator for the Ranfurly Sterling Cash Fund¹.

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at www.sorted.org.nz/tools/investor-kickstarter.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the market index returns data for a 5 year period to 30 September 2017¹. While risk indicators are

Notes

¹ This fund came into existence on 26 May 2017 and received its first investment on 4 September 2017. To calculate the risk indicator, market index return data has been used for the five year period ended 30 September 2017. Using market index return data may make the risk indicator a less reliable indicator of how much fund values are likely to go up and down in future.

² The fund has not yet been in existence for a 12 month period.

³ Excluding GST. The fund has not been in existence for a 12 month period, so the Annual Fund Charges are based on an estimate of assets under management, fund performance, fees and expenses forecast to occur in the 12 months following the first unitisation of the fund. More information about the estimated Annual Fund Charges is available on the Ranfurlly Superannuation Scheme's offer register at www.companiesoffice.govt.nz/disclose.

⁴ As the fund has not been in existence for a 12 month period, these fee estimates are based on our best estimate of the forecast asset flows and fund performance. Fee estimates are calculated monthly based on agreed fee rates as a % of forecast assets in the fund or by allocating estimated direct costs to the fund. We have included all known and expected expenses of the fund in the estimate of Annual Fund Charges. Included in the Annual Fund Charges is an estimate of fees charged monthly by the underlying investment managers to their funds. More information about the estimated Annual Fund Charges is available on the Ranfurlly Superannuation Scheme's offer register at www.companiesoffice.govt.nz/disclose.

⁵ As the fund has not been in existence for a 12 month period, the example has been calculated based on the market index return less estimated Annual Fund Charges. The impact of tax on the market index return cannot be calculated until the Scheme is invested. The Scheme invests into foreign assets where income is determined under the Fair Dividend Rate Method and is subject to tax under the Foreign Investor Zero Rate PIE tax regulations.
